

Press Release 2015-06-23

Cooperation between the **EDR&Medeso Group** and SIGMA

Unna, Germany , June 2015

SIGMA today announces it has entered into a business partnership with the **EDR&Medeso Group**, a simulation solution and service provider in the Nordic region.

Cooperation

SIGMA GmbH, Germany, today announced it has entered into a business partnership with the EDR&Medeso group in order to expand its territory for sales and support of the CAE products ROHR2 and SINETZ in Sweden, Norway, Finland and Denmark.

This partnership was finalized in May 2015. EDR&Medeso as a provider of simulation products and services is a great partner to SIGMA and this agreement exemplifies its dedication to increase its position in the North European engineering software market for its products ROHR2 and SINETZ.

Teaming up with EDR&Medeso to distribute and support the ROHR2 and SINETZ engineering software is an exciting development which will enable SIGMA to be presented by a powerful partner providing local service and knowledge to ROHR2 and SINETZ customers and prospects in the Nordic region.

About: EDR&Medeso AB

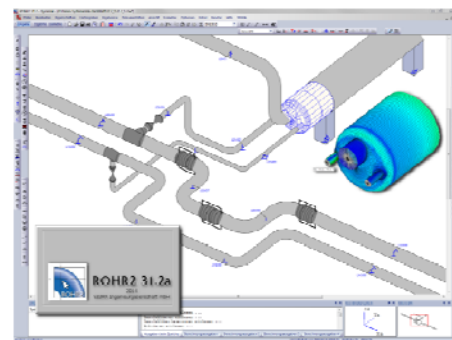

Since 1986, EDRMedeso has provided the market with leading tools for product simulation and BIM. As a complete partner, its organization also offers support, training and consulting services for these tools. The goal is to transfer knowledge and to enable its customers to always get out the most of their software – leading to better and faster design of products, piping systems and buildings.

EDRMedeso presently has eight offices in Sweden, Norway, Denmark and Finland. Among its customers are some of Europe's leading companies in industry, engineering and construction, as well as consultants and specialists at smaller engineering organizations. Furthermore its tools are used at universities and technical colleges at graduate- as well postgraduate levels.

About: ROHR2

For more than 40 years **ROHR2** is a leading Software for Pipe Stress Analysis, a standard tool for pipe static and structural framework analysis, covering a variety of specifications like **ASME**, **EN**, **ISO14692**, **KTA**, **CODETI** or **RCCM**. The software is equipped with a range of additional features enhancing the engineer's daily job, as there are FEM analysis (ROHR2fesu), isometric capabilities (ROHR2iso) and a wide range of CAD and CAE interfaces.

About: SIGMA

SIGMA, established in 1989 in Dortmund, Germany has emerged as a partner of choice for leading international companies with its software and the wide variety of engineering services.

SIGMA is known as one of the leading engineering specialists in the Pipe Stress Business in Europe, offering field tested products, strongly adapted to the user's needs.
